

**Mount Roland**  
LAND CARE

*Talks to enrich our awareness by Mount Roland Land Care*

## The story of the Giant Freshwater Crayfish

~ with special guest Todd Walsh ~

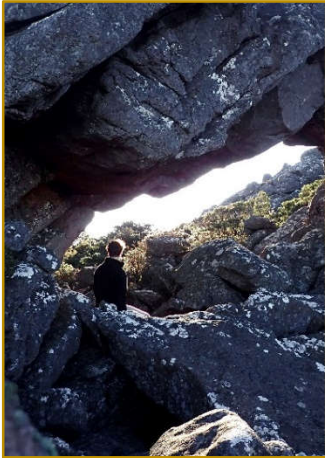

+ New Insights into Life on the Mountain

~ from project coordinator Kristen Lang ~

1.00pm for a 1.30pm start

Saturday May 4<sup>th</sup>, 2024

Claude Road Hall

*Starting with the sweet, uplifting sounds of  
Arcana Rose, voice and guitar, from 1pm*

*Finishing with afternoon tea  
by Klara's Milieu Street Bistro*

From feasting with the family on Giant Freshwater Crayfish to remedying our waterways and championing the species, footballer and river-addict Todd Walsh describes himself as an accidental conservationist. No-one knows more about the GFC than Todd, and no-one interested in our rivers, farmland or wild, should miss hearing him speak. Equally impassioned by a desire to see our wildlife flourish, Kristen has been immersing herself not in rivers but in the creases of Mount Roland's rocks. Seven months of observations have allowed this new MRLC project to reveal species not previously known to be on the mountain. Kristen will share not just the footage she has collected but also her deepening sense of the life we're surrounded by, life we can, by Todd's example, help to protect.

***RSVP essential by 5pm Thursday May 2<sup>nd</sup>  
to: [secretary@mountrolandlandcare.org.au](mailto:secretary@mountrolandlandcare.org.au)***

This is a **free event**, funded by the Healthy Tasmania Fund through the Tasmanian Government and also by the Kentish Council.
