

## **Weed Mapping Notes for weed sites around Mount Roland, including summary of weed control actions conducted**

**Version: Updated December 2020**

**East Mt Roland Area - NOTE THAT THIS AREA WAS MAPPED THROUGH NLP PROGRAM IN 2018 2019, SO THE NEW RECORDS SHOULD BE REFERRED TO WHEN PLANNING WORKS IN THIS AREA.**

**The following records commence from the Eastern side of Mount Roland, where the Minnow River crosses Union Bridge Road, and proceed Westwards around the north side of Mount Roland through to Olivers Road.**

### **Plantation area, west of Union Bridge Road around Minnow River**

444338 5410061 willows, possibly seeding willow 30m x 10m, 50% density, just to east side of forestry road. Scheduled for control 2021

**Minnow River Bridge – 0444906 5409735 acc 8.2m Mont Broome patch 20m x 4m, density 80%, just to east side of bridge on sth side of road. Scotch thistle also present in this area. **Broom and thistles, controlled Dec 2011, May 2013, June 2014, April 2016 2019 2020** No broom plants noted, but foxglove plants now occasional in this area (as per Minnow Weed Mapping 2019)**

**Roadside to west (approx 2km) of Minnow River Bridge, sth side, heath – 20m x 2 m 444540 5410350 acc 3m**

Controlled June 2014 – Inspected 2016 – to be controlled 2020 by Kentish Council

**Dawsons Road – Adjacent to bush block, east roadside, a patch of roadside Spanish heath at 0442598 5411203 acc 7m density 10% over about 30m of roadside**

**Spanish heath controlled 2012, June 2014, April 2016 Nov 2018, June 2020 (one plant)**

## North Mt. Roland area – South of Claude Rd

## Claude Road Firetrails

starting from East end at Wildlife Rd through to Rysavy Rd

### Site No. 1

Firetrail behind Claude Rd houses, joins on to Wildlife Road. Spanish heath, and e. broom

Heath on private land + firetrail 0438717 5412491 acc 4m to 0438690 5412497 acc 3m

Spanish Heath and controlled 2012 2014 2016 2018 2020 – patch about 5m x 3m density 20%

### Site No. 2 (New)

Firetrail behind Claude Rd houses English broom 2x2m 50% density 438608 5412502 acc 3m

Controlled 2016, 2018, 2020 3 plants,

Site No. 3

0438595 5412702 acc 13m Opposite Vale. Spanish heath, Mont broom, English broom 140m x 20m, density 70%, beside track and into bush + 8 mature radiata pines. Rubbish dump. In 2015 area burnt for fuel reduction, resulting in prolific germination of m broom seedlings.

Spanish Heath and Broom controlled 2012 2013 Burnt 2015 Seedlings controlled through pws contract April/May 2015. In 2016, broom seedlings on east and north side of firetrail handpulled, burnt area sprayed in oct 2016. Controlled 2018, still large job. 2020 controlled through working bee implemented through CEP, also collected and removed rubbish.

Site No. 4

438175 5412693 acc 22m Western end of bush block, on fire trail, adjoins private pasture, Spanish Heath– 80m x 5m – 20% density Controlled 2012 and 2016 (50 heath plants) 2018 no heath plants, 2019 7 plants found, 10 plants 2020

+ occasional gorse plants near roadside 0438693 5412455 acc 17m None found in 2016 one plant in 2018, none 2020

Site No. 5

0437738 5412301 acc 9m On Mt Roland Reserve, just west of property at 939 Claude Rd Spanish heath patch 100m x 50m density 50% + M Broom + 3 large radiata pines. Neighbour is Colin Steers, and heath also on his property, boundary uncertain. Heath and broom found over area between walking track and road and Steers' property.

**Spanish Heath controlled 2012 2013 2014 whole site controlled with coop of Colin Steers, radiata pines not controlled. Reserve area controlled 2016, 2018, 2020**

Site No. 6

0437435 5412201 acc 20m - Approx 200 metres west of site 5. Front entrance of 987 & 989 Claude Road, under power lines. Patch of weeds in large triangle shape – 60m long, 60m wide, tapering to 3m wide at top. Density 85% Mont broom, blackberry, Spanish heath, montbretia, blue periwinkle. Broom continues along both sides of track to east, densely at first, then occasional right through to site no. 5. Spanish heath extends up hill track to south, occasional for around 100m

**Spanish Heath and Mont broom controlled 2012 2013 2015 and 2016 Area partially burnt in 2015, with prolific germination of broom seedlings. Subsequently seedlings controlled through pws 2015**

**and 2016 and 2018 (Rivercare)2020 Working Bee. Perimeter of Blackberry sprayed 2012 2013 2014 2015 2016 2018. Rubbish collected 2020**

**Site No. 7 (New Site) 0437260 5412012 south edge of walking track from 989 Claude to Rysavy Rd (approx) 150m east of Rysavy Rd. Spanish heath area 5 x 2 m density 50% all pulled 2016, none present in 2019, though 2 foxgloves present and controlled. 2020 – no weeds present.**

Other firetrails in this area were surveyed 2018 and found to be free of weeds. Some minor bush tracks not surveyed.

## **North West Mt Roland area**

Rysavy Road – Lots of blackberry and thistle, particularly on western side of road, otherwise clear of weeds. Silver Ridge property inspected 2014, no weeds identified.

New site Rysavy Road – adjacent to Silver Ridge entrance sign – 437123 5411405 15sqm 20% density, approx 20 S heath plants controlled 2016, 2018,2020

New site – On track heading ne from Gowrie Park Quarry, Spanish heath, 20 sqm, 40% density, 435783 54120553 controlled 2016, In 2019 no heath but one kunzea found. 2020 no weeds found

Tea Tree Road – Clear of weeds, excepting a few small radiata pines at end near entrance to private property

Disused area between existing Gowrie Park quarry and Claude Rd. large area of radiata pines and Spanish heath + kunzea. Heath at low density through much of the area – heath controlled 2014, 2016 2019, 2020 in two main centres 435678 5410377 (area 200 sqm density 30%), and 435538 5410337 (area 300 sqm density 40%) – in 2014 pines used for xmas trees through Lions Club. Large pines uncontrolled Small patch of kunzea 20 sqm density 50% found and controlled here 2014 2015 2016 2017 2018, 2019, 2020 at 435574 5410290. Kunzea also found at start of track from GP quarry heading sw (cords ???) controlled 2019, and 2020, and on Tasmania Trail heading north (one plant) at 435700 5410499 – no plants observed here in 2020.

Treloars Quarry – heath and kunzea controlled through contract with Treloars 2014,2015, kunzea controlled through rivercare 2016, 2017, 2018, 2019, 2020 This site straddles the boundary between Treloars Quarry and Crown land, mostly on Crown Land

New site – south of Tee Tree Rd, on walking track, under power lines, 435304 5410088, 20 sqm heath and gorse, 25% density, controlled 2016, 2018 – new plant Iris? Found and controlled. In 2020 three gorse plants found.

## West Mt Roland Area

500m West of Gowrie Park, and South of sawmill, track heads from Claude Rd south towards power lines. Old quarry/scrape site, also used as dumping ground. Spanish heath present over area approx

100 m x 20 m density 25% sth end: 433842 5408255 acc18m nth end: 433880 5408423 acc 9m  
 To be controlled, outliers controlled eastern side of track 2014, June 2015 mapped and contained  
 2019, further works needed. Not controlled 2020. Possible working bee site.

Further west along Claude Road, about 200 metres before junction with Lorinna Road, on sth side,  
 track heads into bush, next to large road sign. Around the first 20 metres of this track are Spanish  
 heath and gorse plants (on north side) – **controlled 2012 2013** June 2015 May 2016 432066  
 5408067 acc 13m density 10% In 2016 5 gorse plants and hundreds heath ALSO, new sighting  
 here of Californian Thistle, just on the east side of the entrance to this track. Controlled 2018, 2020  
 – two gorse plants present in 2020

Road to Moina, just east of junction with Staverton Road, south side 5408033 0430038 Occ S  
 Heath controlled 2014, Now controlled by Dept State Growth

Mapping completed to 1km west of Junction with Staverton Road – remainder of road through to  
 moina needs data points recorded.

**Oliver’s Road and south east back to Mersey River – these sites now  
 controlled through Dept of State Growth 2017 2018 2019 2020**
